

Focus Reports **Standard** Version

Powerful Reports Have Never Been Easier!

Focus Reports is a reporting system built to give healthcare practices to-the-point business information from MediSoft software systems. *Focus Reports Professional* includes a wide variety of reports to give unparalleled information on managed care plans, in-depth financial information, marketing statistics, and much more.

Focus Reports Standard includes over 140 reports, charts and graphs, with 24 data export templates.

- Focus on Managed Care

Focus on Managed Care includes eight reports, charts and graphs that give a physician or practice manager the facts they need for important business decisions: Should the practice remain contracted in a managed care plan? Should the practice join a new plan? Decision makers use Focus on Managed Care to know when to accept new patients, renegotiate a contract or adjust fees.

- Focus on Financials

Comprehensive, timely financial information is vital whether a healthcare practice incorporates one or many providers. Focus on Financials includes sixteen reports, charts and graphs that help unlock information in MediSoft software to aid in understanding a practice's financial condition on a day-by-day basis. This information is important because timely financial information leads to good business decisions.

Analyzes all procedures billed to an insurance carrier or plan.

Stay in constant touch with a practice's most important financial indicators.

The daily one page all-in-one report. Daily totals of charges by type, payments by source, adjustments, and graphs for daily charge and payment trends.

Procedure	Capitated		Fee For Service			Patient Payments
	Units	Services	Units	Charges	Ins Payments

Made for MediSoft
Includes Over 140 Reports!

Reports capitated and fee for service charges, payments and adjustments by carrier. This report gives an overview of a plan's overall financial performance.

- Focus on Marketing and Promotion

17 reports, charts and graphs for MediSoft designed to help physicians and practice managers analyze key marketing and promotion information.

- Aging Power Pack

13 reports that help improve management of collection activities.

- Plus Pack

Contains a variety of 40 useful reports like *Collection Summary by Procedure*, *Patient Account Summary*, patient remainder statements, employer statements and more.

- Facility Financials

Reports in this group include familiar MediSoft reports with grouping and totaling by service facility.

- Focus on Chiropractic

Focus on Chiropractic's 26 reports, charts and graphs help doctors and practice managers analyze the key financial, production and referral statistics for their practice.

- Focus on Data

Focus on Data exports MediSoft data into common data interchange formats. Delimited ASCII output formats are built-in for using information in other database and spreadsheet programs.

- Includes the Focus Reports Print Engine

The print engine organizes every included report in easy-to-use categories. Select the report you want to produce, then preview the report, print the report on a printer, or save the report to several types of files, including standard text files, Excel spreadsheet files and Adobe Acrobat .pdf files. A menu selection is installed in your MediSoft software for quick access to every feature Focus Reports offers.

Provider-specific listing of monthly charges, adjustments, payments and withholds. Includes monthly net change in accounts receivable.

Referring healthcare providers frequently represent a large proportion of new patients in some practices. This report summarizes new patients, existing patients, total patient visits with resulting financial effect by month for each referring provider. Versions of the report are included to report on current and prior year periods.

System Requirements: MediSoft version 7, 8, 9, 10 or 11. Works with single-user or network versions. User's computer must meet MediSoft hardware system requirements.

Inborne Technology is a third-party supplier of reporting products for MediSoft software.
